

# BFS

*BLUE FORCE SERVICES*

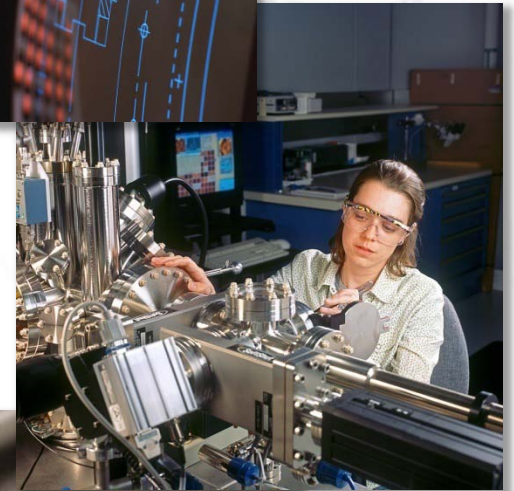

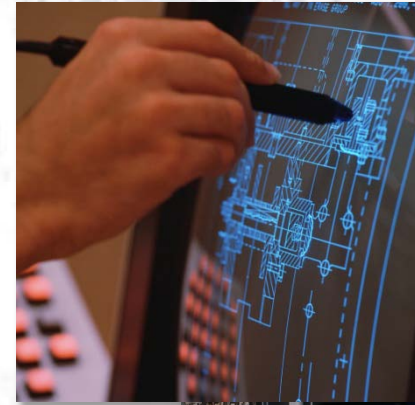

## CORE CAPABILITIES

# An Integrated Solutions Provider

Blue Force Services (BFS) provides integrated solutions in a number of technical disciplines

- Technical Documentation and Training Development Support
- Engineering Support Services
- Integrated Logistics Support Services
- Aircraft and Avionics Maintenance Support
- Technical Staffing (Engineering and Information Technology)
- Program Management Services
- Contract and Resource Team Development
- Marketing and Creative Design

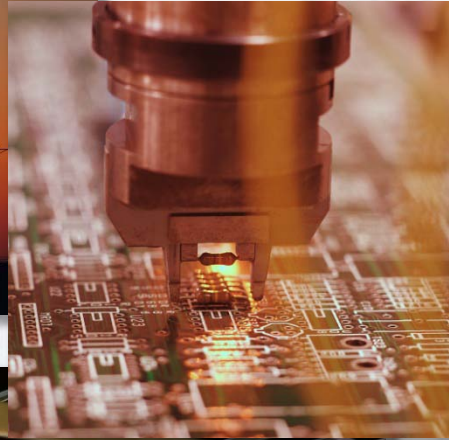

# About Blue Force Services

- A Nationally recognized Supplier and Employer, with locations across North America
- Financially stable private company
- GSA Approved Contractor

## Markets Served

- Aerospace
- U.S. Federal Government
- Automotive
- Military Defense Systems
- State Governments
- Chemical
- Computer Hardware/Software
- Information Technology
- Education
- Food Processing
- Healthcare
- Manufacturing
- Mass Transportation
- Medical

TECHNICAL SERVICES

# Technical and Professional Staff Augmentation

Attracting and retaining talent in a highly competitive global marketplace can be an exceptionally expensive undertaking. BFS has the expertise, tools, and technology to help our clients win the escalating “Talent War”. Our programs and services are flexible to meet client needs in supplying quality talent to deliver long-term, high-impact results.

- Recruiting
- Retaining
- Talent Management
- Executive Talent Search
- Human Resource Outsourcing
- Staffing Services (Contract, Contract-for-Hire, Direct Placement)
- Master Service Provider
- Vendor Management Solutions

# Technical Documentation Content Development

BFS has a team of highly-skilled technical writers, technical illustrators, editors, and project managers who allow us to provide services that encompass the entire technical publications spectrum, from printed materials to interactive electronic manuals (IETMs). Our range of experience includes:

- Engineering Change Proposal (ECP)
- Ground Support Equipment (GSE)
- Installation Design Manual (IDM)
- Installation Manual (IM)
- Maintenance Manual (MM)
- Maintenance Record Card (MRC)
- Operation & Maintenance Manual (O&M)
- Operating Instructions (OI)
- Operator's Manual (OPS)
- Repair Parts & Special Tools Lists (RPSTL)
- Service Bulletins (SB)
- Standard Practices Manual (SPM)

Our strong project management capitalizes on the industry experiences and specialized talents of each individual, while a diverse suite of publishing software and tools ensures seamless integration with customer engineering data and publications styles. BFS has the capability to support conversion and enrichment of legacy data for support of SGML and XML, and are able to produce state-of-the-art electronic publications.

# Integrated Logistics Support

BFS ILS services include:

- Logistics Engineering
- Logistics Management Information (LMI)
- Level of Repair Analysis (LORA)
- Validation Support
- Planning
- Provisioning
- Procurement Support
- Maintenance Support
- Packaging, Handling, Storage and Transportation (PHS&T)
- Design Interface Logistics Element
- Field Service Representatives (FSRs) Deployment
- Warranty Administration/Monitoring

BFS ILS experience includes:

- Providing support services for the entire life cycle of new and existing projects
- Documenting ILS Plans
- Managing budgets
- Maintaining ILS databases
- Performing inspections and verification of PHS&T requirements
- Reliability and Maintainability (RAM) Analyses and Safety Assessments
- Configuration Management Support
- Human Engineering

# Aircraft and Avionics Maintenance Support

BFS provides temporary and long-term skilled contractor maintenance personnel for both recurring and nonrecurring efforts. We have the ability to assemble and deploy the necessary personnel to the directed site within a short time frame.

## Personnel capabilities:

- Inspection
- Maintenance
- Modification
- Repair Services

## Services provided for:

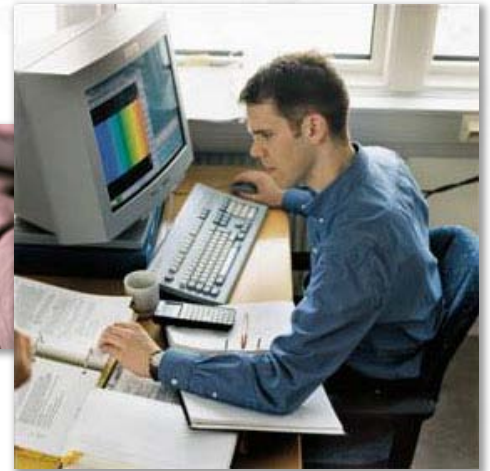

- United States Air Force  
Air Logistics Centers
- Air Combat Command
- Air Mobility Command
- Air Force Reserves
- Air National Guard Facilities

## HR services provided with personnel:

- Recruiting
- Hiring
- Payroll
- Benefits Management
- Technical/Skills Training
- Specific Airframe Training

# Engineering and Design

- Senior level engineers, designers, drafters, and detailers with extensive expertise in various industries and state-of-the-art technical capabilities are ready to embrace every aspect of any design or engineering support project
- Decades of experience and technologically advanced hardware and software allows projects to be properly and professionally addressed, from concept to completion
- Involvement in virtually every type of engineering project from aerospace and automotive tooling to printing equipment
- BFS personnel have designed almost anything you can imagine, from complex automated assembly lines to children's toys, aircraft controls to hip replacements

# Training and Curriculum Development

- BFS provides our clients with exceptional training and curriculum development services, including implementation and operation of state-of-the-art training facilities
- Instructors and training teams have extensive industry experience and technical know-how to focus on human capabilities, interfaces, and limitations throughout the system lifecycle
- Training specialists are able to identify and create effective, targeted learning programs, on-site or via electronic media
- Training development staff has the knowledge needed to create, maintain, and deploy effective Computer Based Training (CBT) courses that are interactive and aesthetically pleasing while relaying all necessary information
- BFS manages the supplier's support capabilities to ensure field service representatives efficiently deploy training, either to end-users at point-of-need or to trainers in a controlled sustainment environment

*BLUE FORCE SERVICES*

CLIENT SAMPLE

# Professional and Technical Staffing

## Engineering Design Program

- Providing design and manufacturing engineers with specific armored vehicle experience
- In process of assembling maintenance teams to provide real time support in-theatre (both Afghanistan and Iraq)
- Providing ILS personnel (technical writers and illustrators, Mil-Spec editors, logistic and software documentation specialists) to deliver technical documentation

## Engineering Support

- Providing design engineer teams of 30 electrical and mechanical engineers with hardware and parametric modeling platforms
- Providing software designers to code various fault integrated systems
- Providing direct Program Management interface project

# Technical Publications

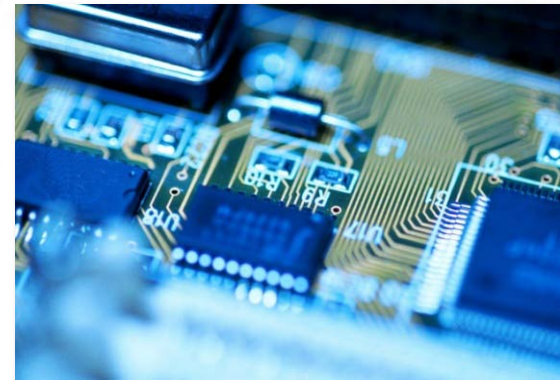

## Technical Manuals

- Providing Operator's, Maintenance and RPSTL Manuals IAW MIL-STD 40051
- Providing project management and full off-site technical documentation team, to include technical writers, illustrators, editors and researchers
- Providing on-site research and documentation of assembly procedures
- Providing support for validation and government verification events
- Documentation project management integrated with overall program management

## Build-to-Order/Configure-to-Order Process Manual

- Developed template to be used by all functional groups in BTO/CTO Manual
- Revised and reformatted source data from various international facilities to merge into a single manual that will be used by all employees and customers
- Coordinated with SMEs from several functional groups in different international locations to gather necessary data and input comments

*BLUE FORCE SERVICES*

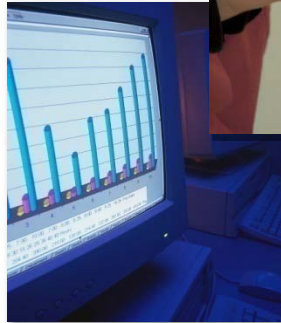

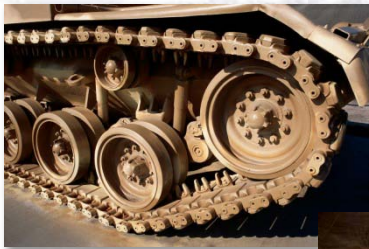

## SUMMARY

# Commitment to Excellence in Service

BFS has the ability to provide turnkey solutions, for any business, from concept to delivery. Our expert-level knowledge of automotive, aerospace, and defense sectors, along with our proven Quality process (ISO 9001 Certified), allows us to handle multiple complex programs and projects. A hands-on management style with the flexibility to adapt to client requirements makes us an invaluable asset to our customers.

# Contract Opportunities

- Technical Documentation
- Aircraft and Avionics Maintenance Support
- Contract and Resource Team Development
- Technical and Professional Staff Augmentation
- Program Management
- Integrated Logistic Support Services
- Systems and Database Administration
- Reverse Engineering
- Design Engineering Support  
(11 CAD/Parametric Platforms)
- Training Support and Facility Management
